

Suraj Radhakrishnan Nair

nairsuraj117@gmail.com | Melbourne, Vic | 0434820093 | www.linkedin.com/in/suraj-radhakrishnan-nair-802821149

SUMMARY

Analytical and detail-oriented Data Science graduate with a strong foundation in Python, SQL, and machine learning. Experienced in building predictive models, automating data pipelines, and visualizing insights using tools such as Power BI and Tableau. Adept at transforming complex datasets into actionable business intelligence to support data-driven decisions. Brings hands-on project experience in demand forecasting, geospatial analysis, and natural language processing. Known for collaborative problem-solving, clear communication, and delivering data solutions that align with organizational goals.

SKILLS AND INTERESTS

- ❖ **Technical Skills** - Python, C, C++, R, SQL, AutoCAD, ANSYS, SolidWorks, Autodesk Fusion 360.
- ❖ **Data Analytics & Visualization:** Proficient in SQL (MySQL, PL/SQL, Oracle), Python (Pandas, NumPy, Matplotlib, Seaborn), Tableau, Power BI, and advanced Excel (Macros, VBA, Pivot Tables).
- ❖ **Machine Learning & Statistical Analysis:** Experienced in predictive modeling, regression analysis, NLP, clustering techniques (K-Means, Decision Trees, Random Forest), and hypothesis testing.
- ❖ **Interests** - Data Scientist, Data Analyst, Machine learning Engineer.
- ❖ **Skills** - Project Management, Strategic Planning, Team Work, Technical and Quality Assurance.

EDUCATION

Deakin University, Burwood, Melbourne

2023-2025

Master of Data Science — Completed and Graduated

- ❖ Specialization: Natural Language Processing (NLP)
- ❖ Completed all 16 credits with focus on machine learning, data analytics, and automation.

SRM University, Chennai, India

2018-2022

Bachelor of Mechanical Engineering

CGPA: 8.3/10

- ❖ Focused on **Finite Element Analysis (FEA)** and **Computational Fluid Dynamics (CFD)** using tools like ANSYS and SolidWorks to analyze structural integrity and optimize mechanical designs.
- ❖ Gained expertise in control systems, kinematics, and automation, integrating **AI** and **IoT** in mechanical systems to enhance efficiency in industrial applications.

PROJECTS

Function to calculate navigation from origin to destination for electric vehicle charging station

- ❖ Integrated **Google Maps API** to compute optimal routes, retrieving distance, time, and polyline details.
- ❖ **Reduced route planning time by 30%** through efficient polyline decoding for visualization.
- ❖ Developed scalable navigation logic supporting multiple origin-destination pairs for real-time EV station suggestions.

Traffic Accident Analysis

- ❖ Cleaned and processed public accident datasets, ensuring **98% data completeness** after imputation.
- ❖ Applied **DBSCAN clustering** and spatial joins to identify high-risk accident zones.
- ❖ Built predictive models that improved accident trend forecasting by **22% using Random Forests**.

EXPERIENCE

FUJI TECHNICAL SERVICES PVT. LTD.

May 2022- Feb2023

- ❖ Managed government tenders for tools, pumps, lifting materials, and railway spares, ensuring compliance and competitive pricing.
- ❖ Handled vendor negotiations, procurement, and cost analysis, optimizing quality, price, and delivery timelines.
- ❖ Led inspections, AutoCAD drawings, and project execution for clients like Railways, Cochin Shipyard, and Nuclear Power Corporation.
- ❖ Negotiate for the best price and select the best vendor based on following criteria such as quality, price, product, delivery time, payment terms etc.
- ❖ Costing and preparing the Financial BOQ provided in the tender to be L1 to get the tender along with its documentation to qualify technically.
